

The NEW air controls are modular, allowing installers and operators to choose the position of each air control in the module.

TRUCK CONTROL SYSTEM

FEATURES

- Proportional Control
- Dead-man safety
- Modular design
- Steel construction for long life

FUNCTION—PTO, TIP/LOWER + 1 or 2 AUXILIARY

CODE	FUNCTION	*WH&S OPTIONS
AIRST001	PTO, Tip/Lower + Tailgate	Tip/Lower position

*Operation of a tipping truck may require either dead-man or locked controls which is dependent on the WH&S risk review of truck owners and installers. GFR Industries ALWAYS recommends the installation and use of dead-man controls where ever possible.
